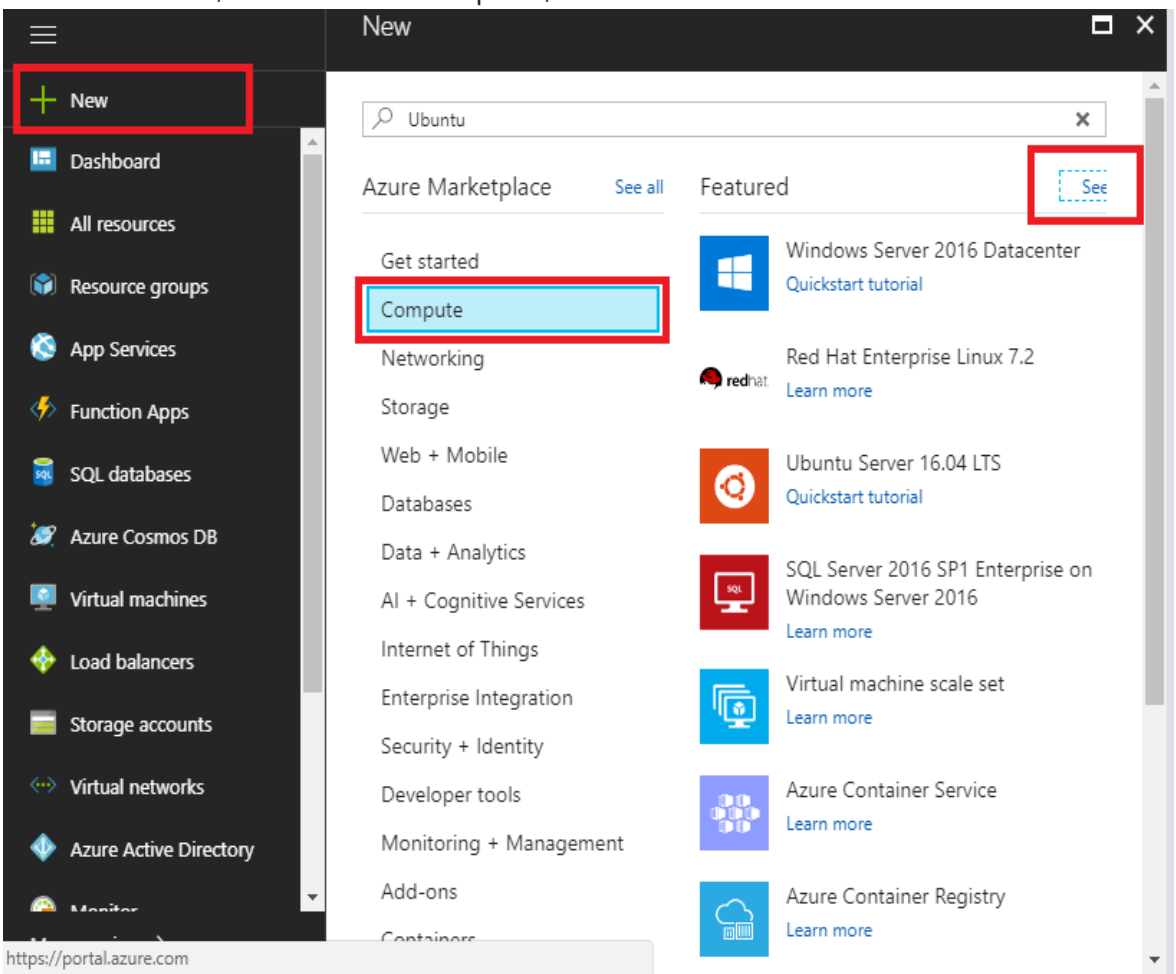
Ubuntu Virtual Machine-LAMP Stack Web Server

Create Ubuntu Virtual Machine

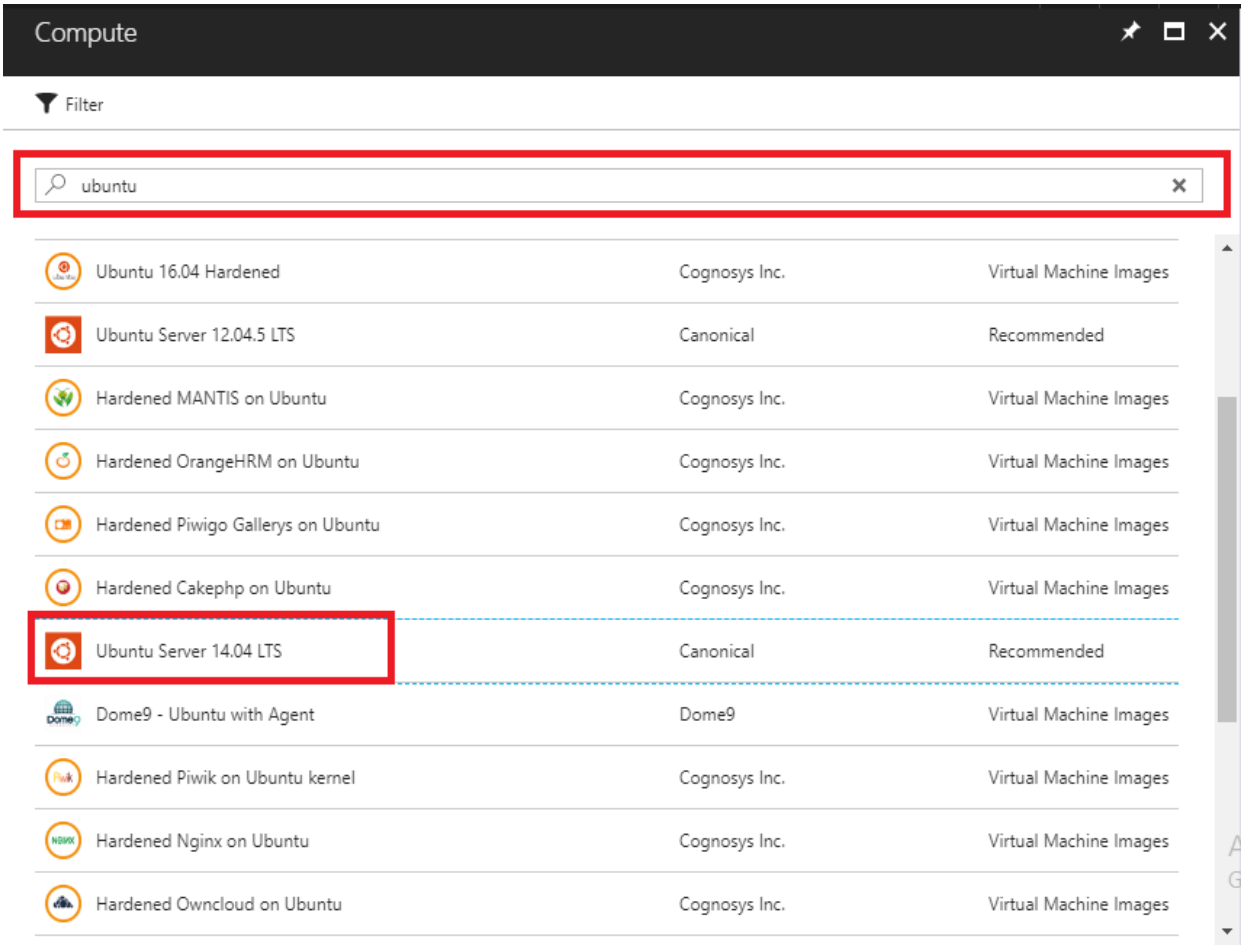
Create Ubuntu virtual Machine

0. Launch a browser and navigate to https://portal.azure.com. Once prompted, login with your Microsoft Azure credentials.

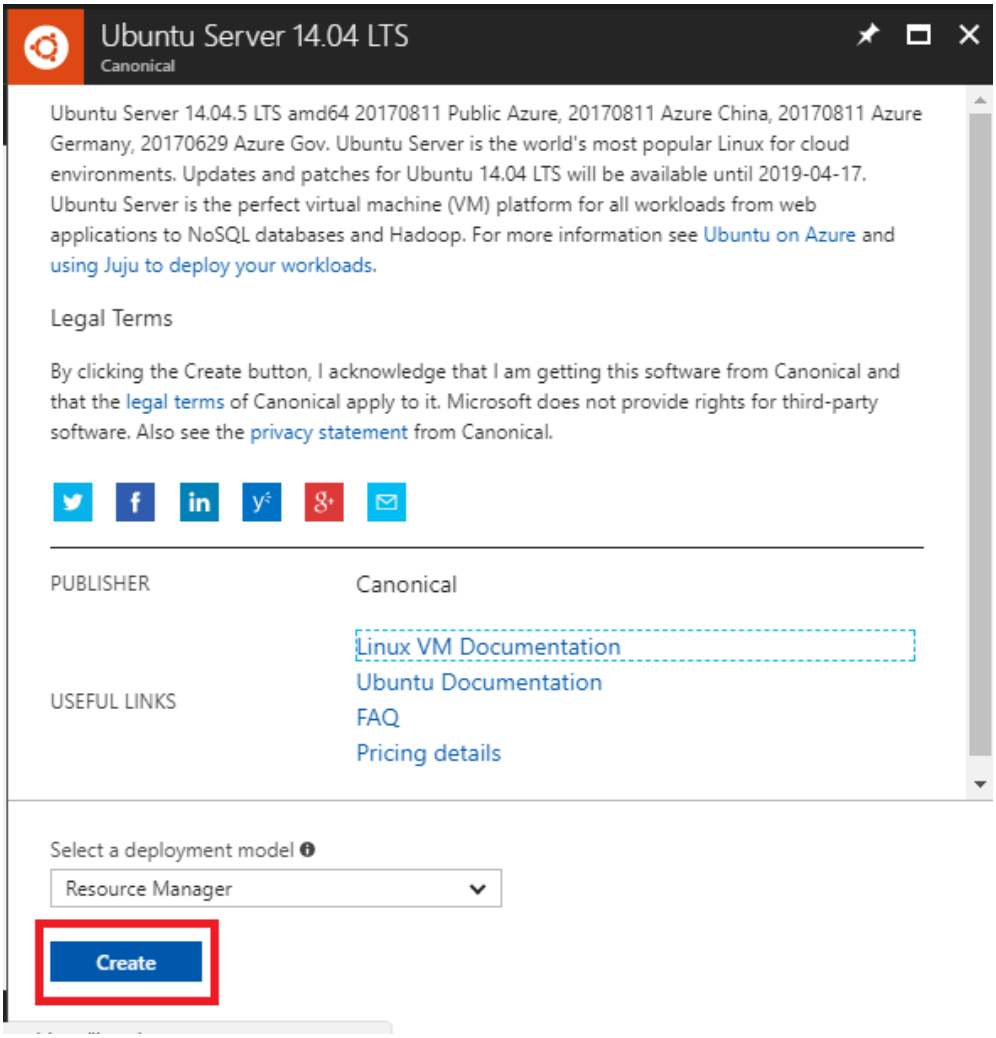
1. Click on +NEW, then click on Compute , and click on See All.



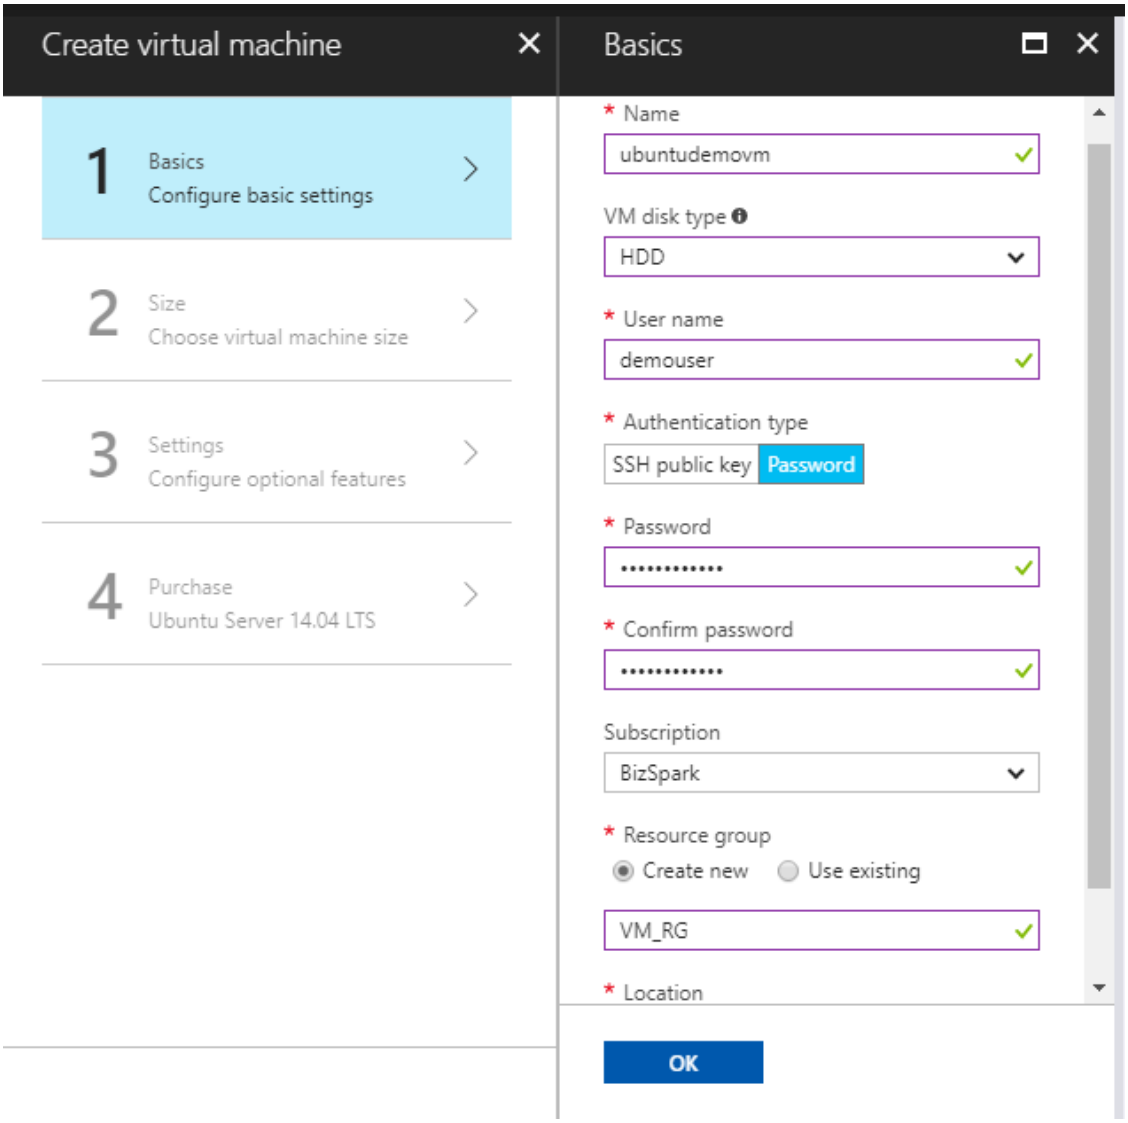
2. On the Filter blade, enter "Ubuntu" and click search
   - Click on Ubuntu Server 14.04 LTS



3. Click Create.



4. In the virtual machine's Basic blade, add the following details:



Name : ubuntudemovm

VM Disk Type : HDD

User Name : demouser

Authentication Type : Password

Password : xxxxxxxxxx

Confirm password: xxxxxxxxxx

Subscription : keep it as default.

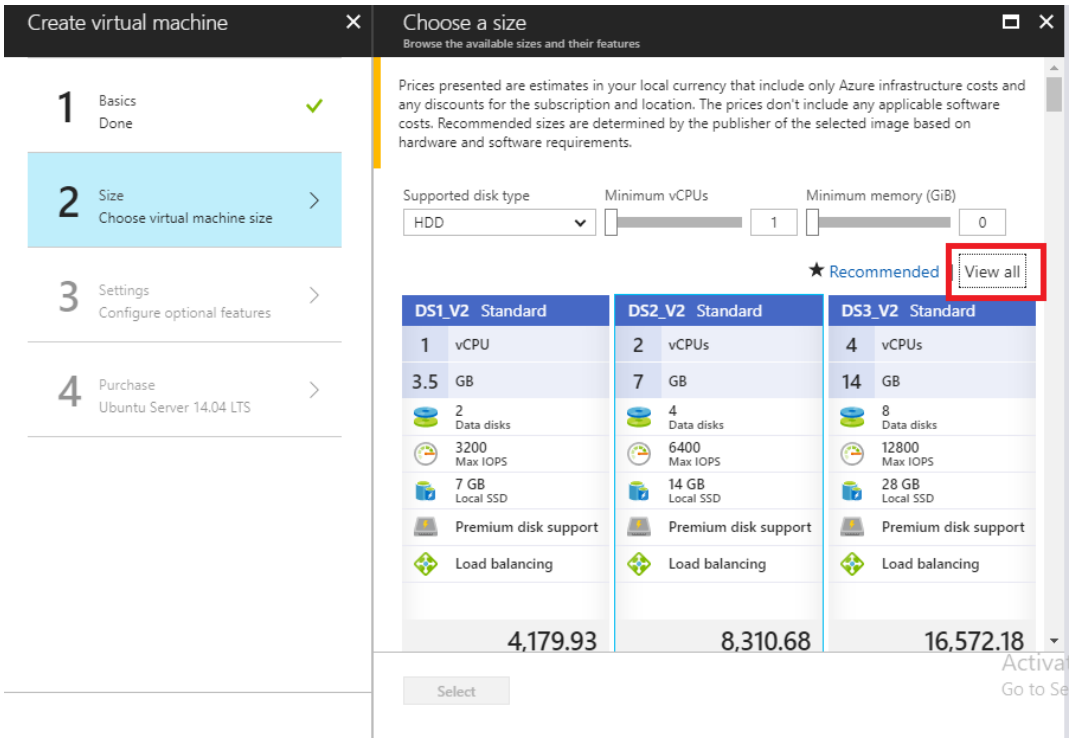
Resource Group : (select) Create New

And enter VM_RG

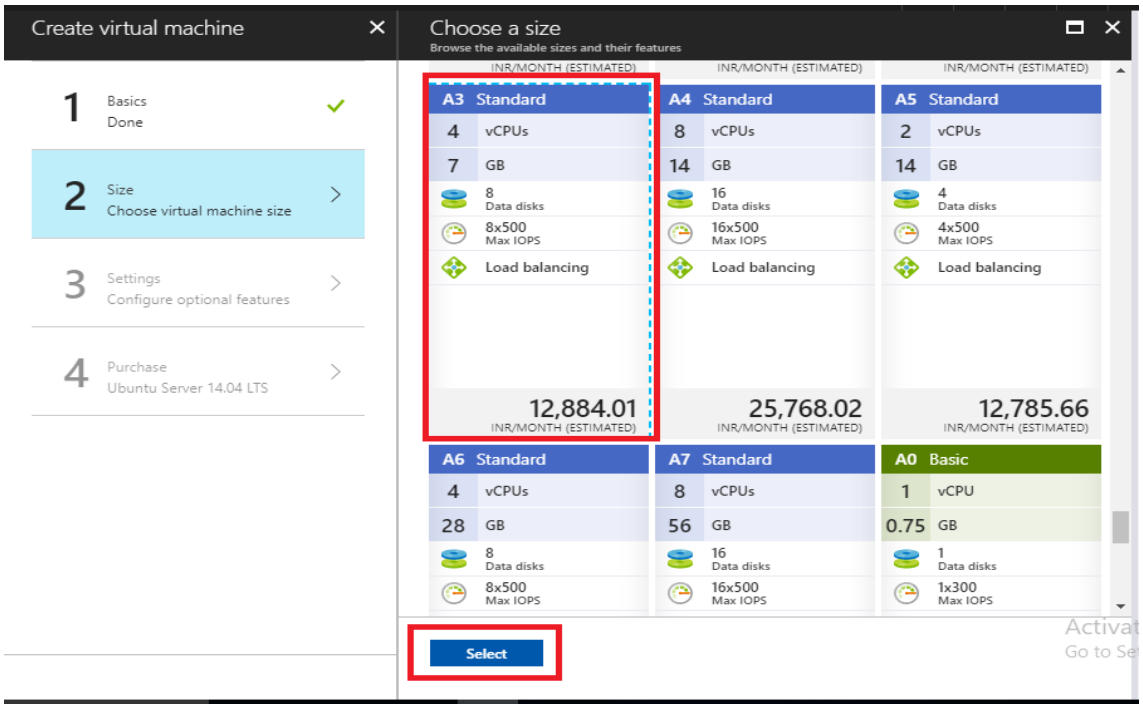
Location : West india

Then Click on OK Button.

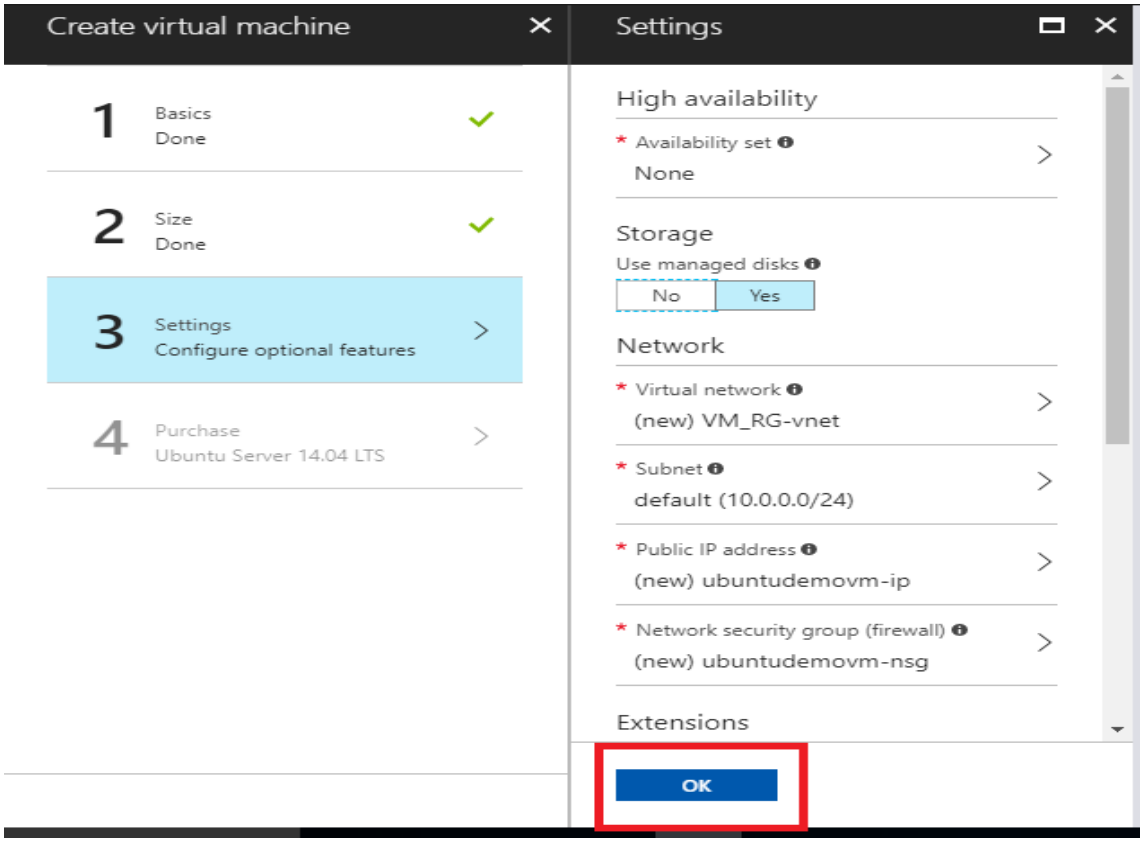
5. In the Choose a size blade, Click “View All”



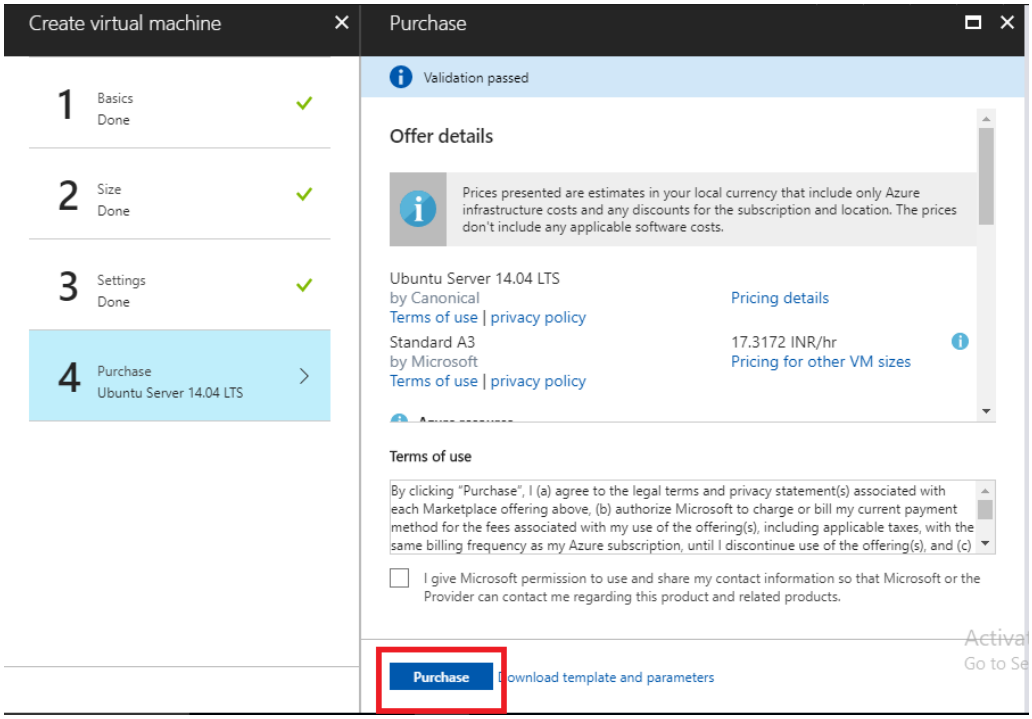
Select “A3 Standard” machine and click on “select” button.



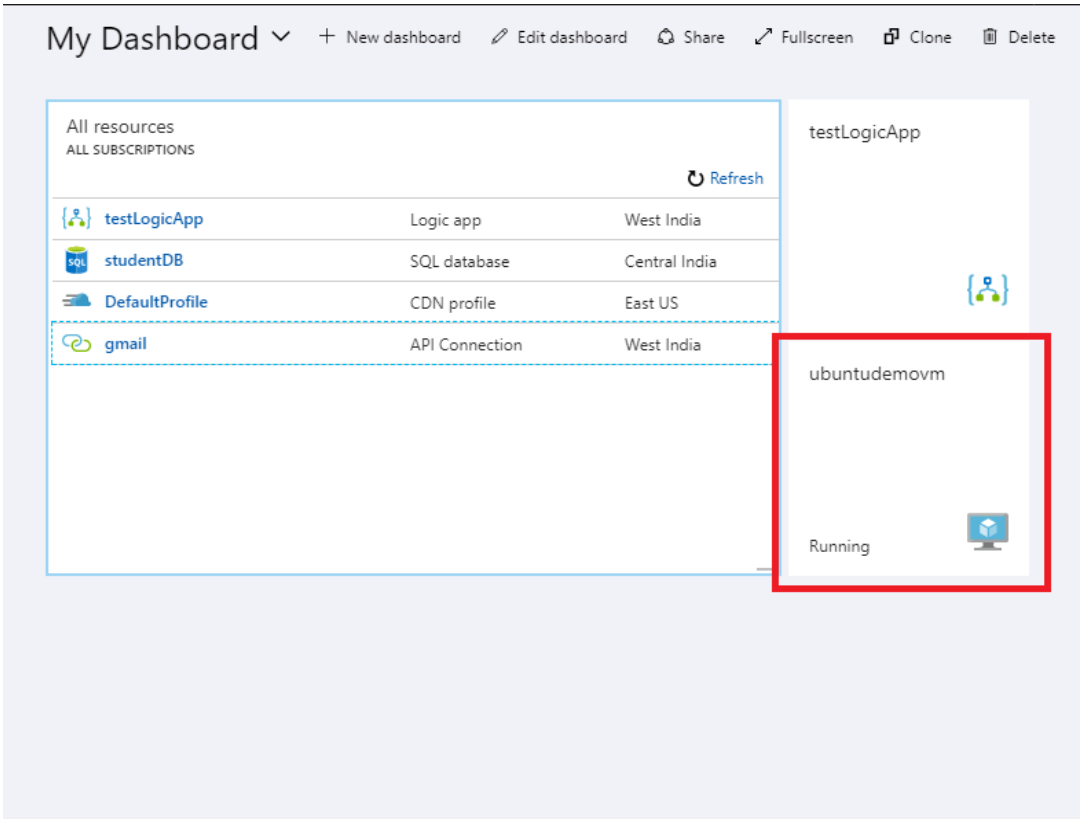
On the “Settings” blade, keep everything as it is and click ok.



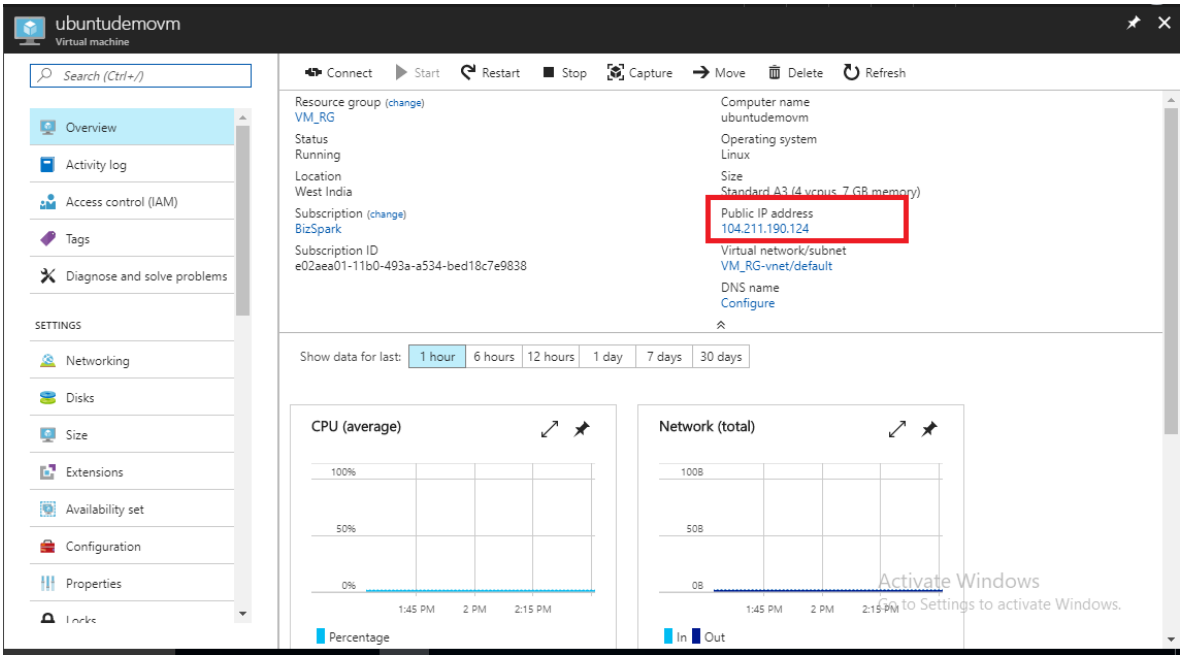
On the purchase blade, Only click on “Purchase”.



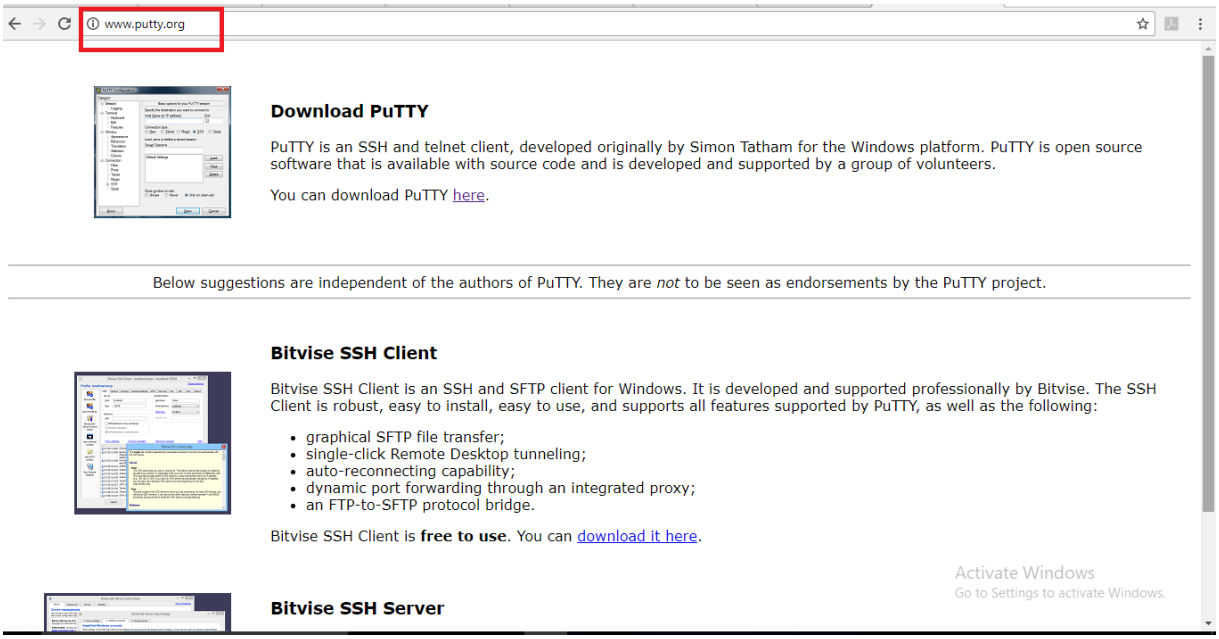
7. Now open the newly created Ubuntu virtual Machine from dashboard.



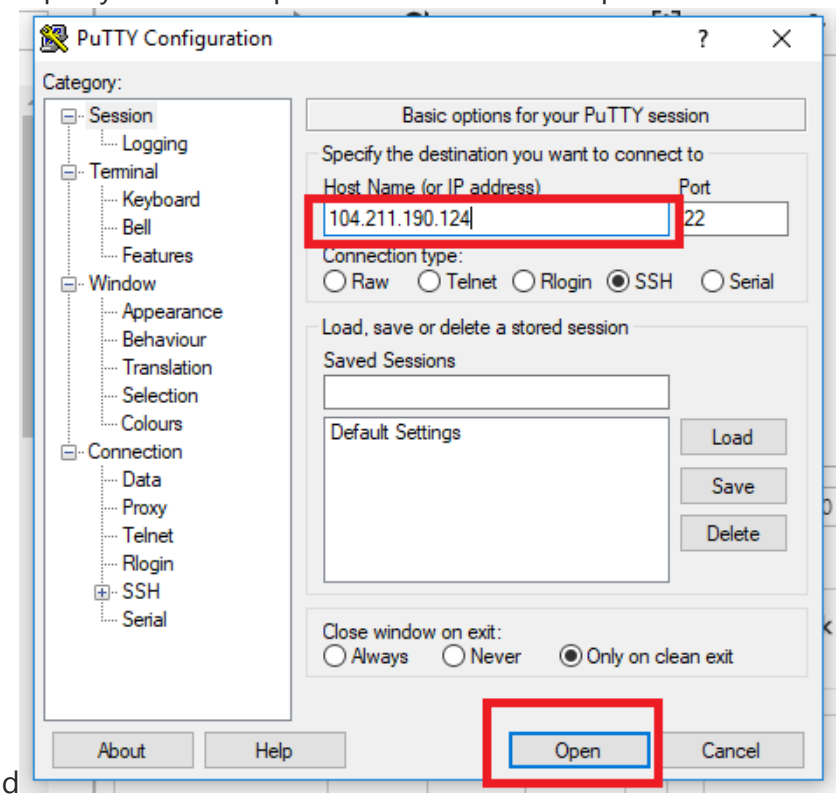
Copy the Public IP address and keep paste in notepad for future use.



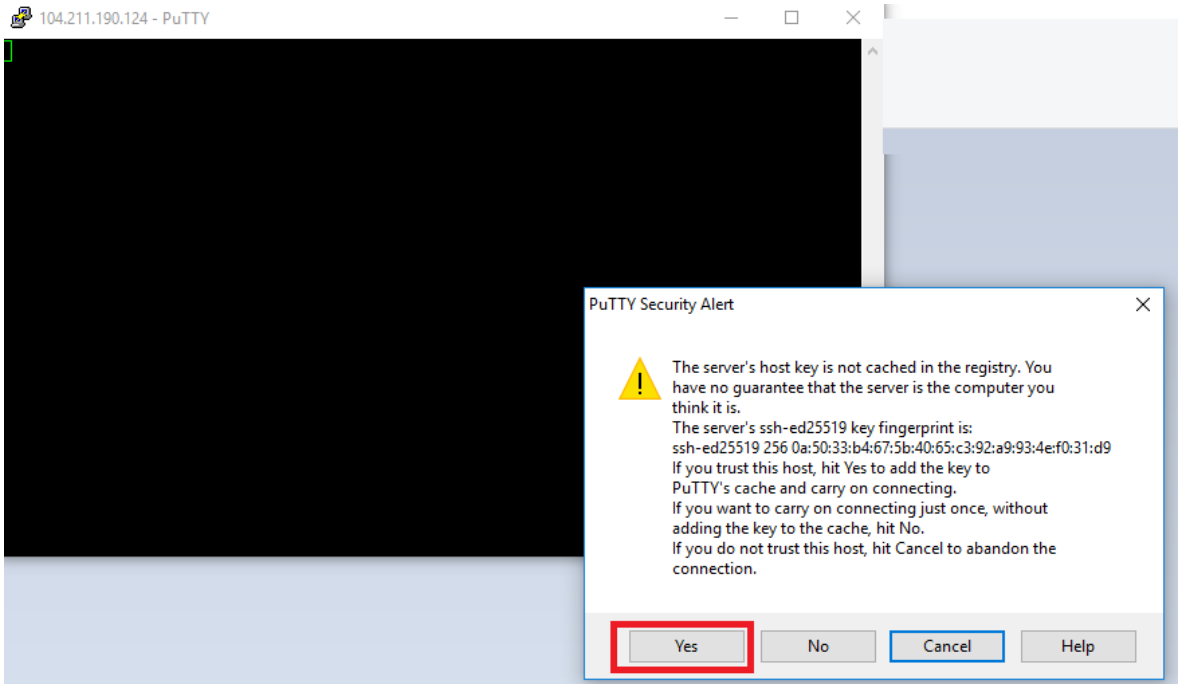
8. Download and install putty from www.putty.org



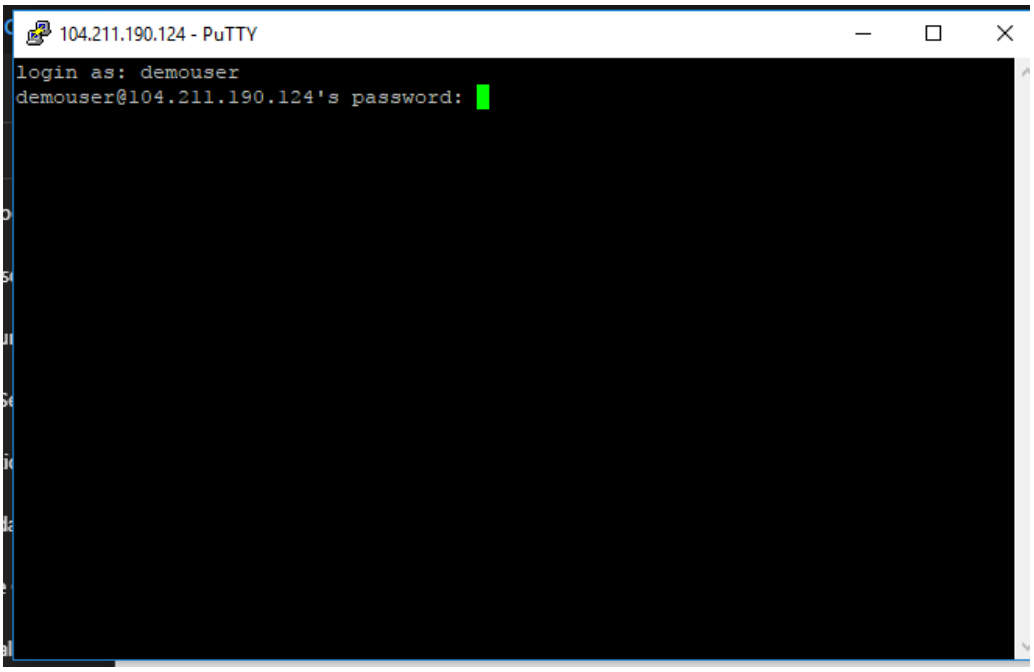
9. Open putty and insert ip address and click on open.



ad



Insert username and passwork which we have given during virtual machine creation



On prompt type : sudo su and press enter
